

Resolution#08-0616-05

A Resolution authorizing the Township Administrator to expend funds for phone system upgrades

Whereas, Liberty Township Fire Department has studied the implementation of a Virtual Private Network to carry the data and phone communication of the organization which has been approved by the Board of Trustees, and

Whereas, there is a need to upgrade components of the phone system to allow the system to be upgraded very inexpensively (when compared to purchasing an entirely new system) to allow the "new" digital format to run over the majority of the existing hardware,

Whereas, the staff has evaluated the options in the past and recommend this direction and recommend the outlay be distributed equally among the five buildings and departments to pay for the costs indicated on the submitted proposal,

Now, therefore Be it Resolved, by the Liberty Township Board of Trustees that the fire department is authorized to expend funds not to exceed \$5,000 in accordance with the submitted proposal for equipment and/or services from Parallel Technologies, Inc., the Township's phone vendor using funds from the General fund, Fire funds and Road Department funds equally.
