Liberty Township Capital Outlay Form Fiscal Year 2009

Department: **EMS**

Prepared By: _____

Select One: New Program

Date: _____

Existing Program

1. Program Description:

Emergency Medical services has been providing 12 lead technology for over 10 years. The devices that we have are on the verge of not being servicable by the manufacturer and the 3 lead monitors are antiquated devices to today's standard. Keeping Liberty Township cutting edge prehospital care providers (Grant - Assistance to Firefighters 2008) was written and accepted for Liberty Township to purchase 2 LP 12 heart monitors and 8 LP 1000 monitors both with needed accessory equipment to begin service to the community. The equipment purchase is on state contract with Ohio #7765200508

2. Service Delivery Impact

The EMS personnel will be able to identify and treat patients more specifically to their emergency. In fact, it is expected that with the new technology, the paramedic will be able to identify some specific issues even before the patient is even making a complaint about the problem. The LP 1000's have been requested to replace the antiquated LP10 models. They will be placed strategically so that early defibrillation will be available when needed.

3. Personnel Requirements:

Everyone is already trained with the Lifepak devices. There will be training needed to update the personnel on the new technology which can be done as an inservice and the use of Columbus State training curriculum. Medics will then have to show proficiency on the equipment prior to them hitting the streets for use. Expected dates 30- 45 days for delivery Training- 30 days after delivery

4. Cost Impact of New Program:
