The Community Committee serves as a steering committee to guide the long range, comprehensive plan process. The Committee has spent the past few months working with a consultant, Crossroads Community Planning, LLC to complete a Strengths, Weaknesses, Opportunities, and Threats analysis, establish a Vision Statement, and identify Values and Goals to serve as guiding principals for the comprehensive plan. The Committee has also created a draft of a Future Land Use Map for the Township, which will be discussed at each neighborhood meeting.

The goal of the comprehensive plan is to create a shared vision as well as values, goals, and action steps for future policy land use decisions. Resident input and participation are extremely important at this stage of the Liberty 2040 – Community Plan process.
