PREPARATION PROCEDURES

1. Washing of all the areas that will be painted that fit the description above. We will use a commercial grade pressure washer to remove mildew, algae, dirt and salt deposits. Hand washing and bleach solution will be done on an as-needed basis.
2. Extensive tarping of all surfaces and landscaping to be worked over will be done with canvas and plastic tarps. Also, tape will be used to protect any areas where tarps would be impractical.
3. Failing paint and rust will be removed with hand scrapers on flat surfaces and wire brushes on cedar or rusting areas.
4. Bare wood and metal will be primed with the appropriate primers.
5. A top of the line exterior caulk will be applied prior to painting as needed.
6. Downspouts and address numbers will be removed by the team where applicable (vertical downspouts only - not the gutters). We ask for your assistance in removing all screen, plant holders, porch furniture, etc. from areas where we will be working.

PAINTING PROCEDURES

1. We will provide all the necessary equipment. Lift rental, if necessary, will be an additional charge.
2. First coat of paint or stain will be given enough time to dry before applying the second, when 2 coat jobs are performed.
3. The team will clean-up as it finishes each side and at the end of each day, equipment will be stacked or locked in the trailer.
4. Color World carries BWC with 2 million dollars insurance with each job.
5. 2 coat jobs are guaranteed for 2 years. If any paint or stain applied by us fails caused by improper application, we will fix it free under your maintenance warranty.

Specific Work Notes:

- All windows will be taped off prior to painting.
- Any loose nails will be hammered back in by the team.
- Thorough caulking will be done anywhere wood meets wood.
